The question is stated in this manner as stated in our article example. The first question has been solved as an example to demonstrate the procedure and refresh your memory on how to read the Vernier calipers scale. Step 1: Note the position of the Vernier scale zero (the first mark) on the main scale to one decimal place. In this case it is 2.0 Step 2: Observe which mark on the Vernier scale aligns best with the markings on the main scale. Here you can see the 8th division seems to be the best choice. So the Vernier scale reading will be 0.08 by multiplying it with fractional part i.e. 0.01. Step 3: Add the Vernier scale reading to the main scale to get the answer. i.e. $2.0 + 0.08$. So the answer is 2.08 cm. The worksheet contains a total of 10 similar questions which will provide a good practice of your abilities.
